## Unit 3 - Linear Systems HW list

## Tentative TEST date

$\qquad$

## Big idea/Learning Goals

In this unit you will learn how to solve two equations with two unknowns. The unit is called linear systems since there will be more than one line involved. There are three methods you'll be shown in class: graphing method, elimination method, and substitution method.

If you did not do well on the past unit of solving equations, please see your teacher to catch up since this unit is impossible to do well in if you don't have the basics.

If you ever miss any class you are responsible to catch up on the lesson done in the Survival Guide and the homework pages assigned. Use the website www.mrsk.ca

3. Describe how you feel about your current mark in math
4. Calculate your potential final mark to see how averages work. Ensure to follow BEDMAS:
potential final mark $=($ overall mark now $)($ weight so far $)+($ guess at your future mark)(weight to come)

$$

=( & (0.20)+( & + \\
= & 0.80)
