## Using Excel to model Gas Prices - BONUS

| Year | Years since <br> 1981 | Price <br> (cents/L) |
| :---: | :---: | :---: |
| 1981 | 0 | 40.5 |
| 1982 | 1 | 45.4 |
| 1983 | 2 | 47.95 |
| 1984 | 3 | 48.4 |
| 1985 | 4 | 51.65 |
| 1986 | 5 | 44.1 |
| 1987 | 6 | 48.8 |
| 1988 | 7 | 47.6 |
| 1989 | 8 | 51.5 |
| 1990 | 9 | 56.55 |
| 1991 | 10 | 54.4 |
| 1992 | 11 | 54.35 |
| 1993 | 12 | 52.3 |

| Year | Years since <br> 1981 | Price <br> (cents/L) |
| :---: | :---: | :---: |
| 1994 | 13 | 50.65 |
| 1995 | 14 | 53.5 |
| 1996 | 15 | 58.0 |
| 1997 | 16 | 58.05 |
| 1998 | 17 | 53.45 |
| 1999 | 18 | 58.1 |
| 2000 | 19 | 72.75 |
| 2001 | 20 | 69.85 |
| 2002 | 21 | 70.85 |
| 2003 | 22 | 72.45 |
| 2004 | 23 | 79.55 |
| 2005 | 24 | 88.25 |
| 2006 | 25 | 93.65 |

1. Open Excel: Start, Programs, Excel
2. Enter the data given.
3. Select the data values for year and price and create a scatter plot.

$\qquad$
4. Click on apy data point. Then do Right click and pop up menu will appear. Select Add Trendline , then select Trend/Regression type.
5. Find Options Tab. Check " Display Equation on Chart " and " Display R-squared value on chart " Note the closer R -squared value is to 1 , the better the model is to the data given.
Try different Regression types:
6. LINEAR

Record the equation $\mathrm{y}=$ $\qquad$ and $R^{2}=$ $\qquad$
7. EXPONENTIAL

Record the equation $y=$ $\qquad$ and $R^{2}=$ $\qquad$
8. QUADRATIC

Record the equation $y=$ $\qquad$ and $R^{2}=$ $\qquad$
9. CUBIC

Record the equation $y=$ $\qquad$ and $R^{2}=$ $\qquad$
10. Use all the models to predict the gas price in the year 1999 and 2015.
11. Based on the results discuss the usefulness of mathematical models to interpolate versus extrapolate values. Discuss why this is so.

## Using Fathom to model a Bungee Jump - BONUS

The height versus time data of a bungee jumper are given in the table, for the first half minute or so of his jump. Heights are referenced to the rest position of the bungee jumper, which is well above ground level.

| Time(s) | 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Height $(\mathrm{m})$ | 100 | 90 | 72 | 45 | 14 | -15 | -41 | -61 | -71 | -73 | -66 |
|  | -52 | -32 |  |  |  |  |  |  |  |  |  |

| Time(s) | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 | 21 | 22 | 23 | 24 | 25 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Height(m) | -11 | 11 | 30 | 44 | 53 | 54 | 48 | 37 | 23 | 6 | -8 | -23 | -33 |
| Time(s) | 26 | 27 | 28 | 29 | 30 | 31 | 32 | 33 | 34 | 35 | 36 | 37 |  |
| Height(m) | -39 | -39 | -35 | -27 | -16 | -4 | 6 | 17 | 24 | 28 | 29 | 26 |  |

1. Open Fathom: Start, Programs, Fathom
2. Drag a collection into the workspace.
3. Double click on the box (not the name of it) and enter the following information

| Cases $\mid$ Measures $\mid$ Comments $\mid$ Display $\mid$ |  |  |
| :---: | :---: | :---: |
| Attribute | Value | Formula |
| time_s |  |  |
| Height_m |  |  |
| snews |  |  |

4. Drag a table into the workspace.
5. Enter the values from the table above like shown

| Collection 1 |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |

Drag a graph into the workspace.
6. Select the time column and drag it onto the $x$-axis of the graph. Then select the height column and drag it into the $y$-axis of the graph to get this result:

7. Describe how the graph exhibits sinusoidal features.
8. Describe how the graph exhibits exponential features.
$\qquad$

Constructing a Cosine Function:
9. Drag a slider into the workspace. Rename it $k$. Click on the graph. From the Graph menu, choose Plot Function. Enter the function 100* $\cos \left(k^{*}\right.$ time_s) Adjust the slider until the crests and troughs of the function occur at the same time values on the scatter plot.

The value of $k$ is $\qquad$

Constructing an Exponential Function
10. Repeat the steps used for cosine function with a new slider called $c$, and new equation $100^{*} 0.5^{\wedge}\left(c^{*}\right.$ time_s). Adjust the slider so that the graph of exponential touches each crest of the scatter plot.

The value of $c$ is $\qquad$

- Height_m $=100 \cos (k$ time s)
- Height_m $=100 \cdot 0.5$ ( 0 time_s)

## Construct a Combined function

11. Click on the graph. From the Graph menu, choose Plot Function. Enter the function $100^{*} \cos \left(k^{*} \text { time_s }\right)^{*} 0.5^{\wedge}\left(c^{*}\right.$ time_s).
Adjust the values of $k$ and $c$ if needed.
The final value of $k$ is $\qquad$ The final value of $c$ is $\qquad$

-Height_m $=100 \cos (\mathrm{k}$-time_s) time_s

-Height_ $m=100 \cos (k \cdot$ time $s) \cdot 0.5^{(0)}$ time_s $)$
12. How far will the bungee jumper be above the rest position at his fourth crest?
13. For how long will the bungee jumper bounce before his amplitude has diminished to 10 m ?
14. What is the significance of the factor of 100 ?
15. Why was a cosine function chosen instead of a sine function?
16. When the cosine function and the exponential function are combined, only one factor of 100 is used. Why?
17. When is the magnitude of the rate of change of this function the greatest? What does this mean from a physical perspective?
$\qquad$

## Find Applications of Functions \& Compare to Polynomials - BONUS

Note to students: See the rubric below for the criteria.
Be prepared to discuss the following with your teacher and peers.

1. In this course, you had the opportunity to investigate several different types of functions: Polynomial, Rational, Exponential, Logarithmic and Trigonometric. Select one non-polynomial function, exponential, trigonometric, or another type, and use your favourite search engine to hunt for an
application - something that is a part of 'real life' - of your family of functions. Use a search phrase like "Interesting Exponential Functions" or one of your own invention.
2. Find a site that you think is interesting. Explore it.
3. Record:

- The search engine you used, and the search phrase you used.
- The URL you found.
- A brief description of the contents of the site, and your reasons for choosing this site.
- A description of the key features of your chosen function and a comparison to the key features you've learned about of polynomial functions.

4. Share your site with one of your classmates. Check out your classmates' site.
$\qquad$

Rubric

Activity 2: Identifying a Variety of Functions Graphically

| Categories | $\begin{gathered} \text { Level } 1 \\ (50-59 \%) \end{gathered}$ | $\begin{gathered} \text { Level } 2 \\ (60-69 \%) \end{gathered}$ | $\begin{gathered} \text { Level } 3 \\ (70-79 \%) \end{gathered}$ | $\begin{gathered} \text { Level } 4 \\ (80-100 \%) \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: |
| Knowledge/Understanding: distinguish polynomial functions from sinusoidal and exponential functions. P01.04. | Distinguishes polynomial functions from sinusoidal and exponential functions with limited accuracy. | Distinguishes polynomial functions from sinusoidal and exponential functions with some accuracy. | Distinguishes polynomial functions from sinusoidal and exponential functions with considerable accuracy. | Distinguishes polynomial functions from sinusoidal and exponential functions with a high degree of accuracy. |
| Communication: compare the graphs of various polynomial functions with the graphs of other types of functions. PO1.04. | Compares the graphs of various polynomial functions with the graphs of other types of functions with limited relevance. | Compares the graphs of various polynomial functions with the graphs of other types of functions with some relevance. | Compares the graphs of various polynomial functions with the graphs of other types of functions with considerable relevance. | Compares the graphs of various polynomial functions with the graphs of other types of functions with a high degree of relevance. |
| Application: <br> describe key features of the graphs of polynomial functions. P01.03. | Describes a few key features of the graphs of polynomial functions. | Describes some key features of the graphs of polynomial functions. | Describes most key features of the graphs of polynomial functions. | Describes almost all key features of the graphs of polynomial functions. |

Note: A student whose achievement is below Level 1 (50\%) has not met the expectations for this assignment or activity.
